PROFILE

I've worked as a designer, a frontend engineer and a product manager, often all at once. Now I design and build AI products, from the experience to the evals.

EXPERIENCE

Senior Frontend Engineer, Hublsoft

Now
Mar 2021

- HublAI: AI-directed data exploration and storytelling in an enterprise data product, first as workflows for business users, now as a multi-agent harness.
- Work across the experience, the prompts, tools and context, and the evals that prove they work.
- Before that, design and frontend for an Innovate UK-funded programme on advanced AI capabilities.

UX Developer, Pierbridge

Mar 2021
Sep 2019

- Led the frontend re-architecture of a parcel TMS product using React and TypeScript.
- Delivered UX and concept design for a data mapping tool to streamline workflows.

Senior Frontend Engineer, Effective Experiments

Aug 2019
Feb 2019

- Worked in a product team rebuilding a legacy application in React and GraphQL.
- Built a React component library in Storybook.

Lead Frontend Developer, Bytemark

Feb 2019
Nov 2017

- Led UI design and frontend development of the company's core applications.

Product Manager, Bytemark

Nov 2017
Jun 2016

- Drove customer-led product strategy, marketing and vision.
- Led a cross-functional team; increased revenue per customer by 35% and the customer base by 15%.

UX Developer, Bytemark

Jun 2016
Jan 2014

- Designed and built the first visual interfaces for customers, who until then had only the command line.
- The cloud server control panel became the customer portal, still in use more than ten years on.

Freelance Designer and Developer

Jan 2014
Oct 2012

- Worked on Wren Kitchens' visual kitchen planning app, on contract.

Interaction Designer, Designition

Sep 2012
Sep 2009

- Came back after the MSc to shape how projects worked, not only how they looked, filling in with visual design and full-stack development (PHP) where needed.
- Led client relationships, and took the unusual projects from start to finish.

Senior Designer, Designition

Sep 2008
Jun 2005

- Visual design and frontend code for websites and applications, large and small.
- Won two major industry awards for websites designed and developed in-house.

Founder, Clearbar

Dec 2005
Oct 2003

- Founded a web design and development business, and taught myself the trade and how to run it.

PROJECTS

Eddy

A family video app. A model running at home checks every video a kid shares against their age, and the feed ends. In daily family use since April.

`Gemma 4 · Ollama · Node · SQLite · iOS`

One Thought

A golf app for carrying one thought round the course.

EDUCATION

MSc Human-Centred Interactive Technologies, University of York

2008 – 2009

- Distinction, with an average mark above 90%.
- Fully funded ESRC scholarship.

MA (Hons) Political Science, 2:1, University of Glasgow

1999 – 2003

SKILLS

TypeScript, React, GraphQL, Node, SQLite · LLM workflows, multi-agent harnesses, tools, context engineering, evals · Local models (Ollama) · Built with Claude Code, Codex and Pi
